# FACTS

**OF CONSUMERS ARE  
WILLING TO PAY A  
PREMIUM FOR LOCALLY  
GROWN FOOD\*\***

# \$13.7 BILLION

**AGRICULTURE CONTRIBUTES TO ONTARIO'S  
GDP ANNUALLY\***

**3 OUT OF 10 CONSUMERS SHOP AT LOCAL  
FARMERS MARKETS\*\*\***

\*Ontario Federation of Agriculture 2018

\*\*Dalhousie University 2020

\*\*\*Pearl Strategy and Innovation Design 2019

---

# NETWORK

---

Connecting with other buyers and sellers, especially with the added challenges of the pandemic.

Knowing the market value and trends for products of interest.

---

# INSIGHT

---

---

# OUR SOLUTION

---

FieldFresh is a multipart solution to connect users and empower them to buy and sell local food at the prices dictated by the market.

---

# PRODUCT OVERVIEW

---

## MATCHING ENGINE

Matches buyers and sellers,  
and sets the optimal market  
price for goods.

## MOBILE APP

An iOS and Android  
application that allows users  
to interact with the matching  
engine.

# JOURNEY

**PROBLEM DISCOVERY**

JUNE 2020

**REQUIREMENTS  
GENERATED**  
JUNE 2020

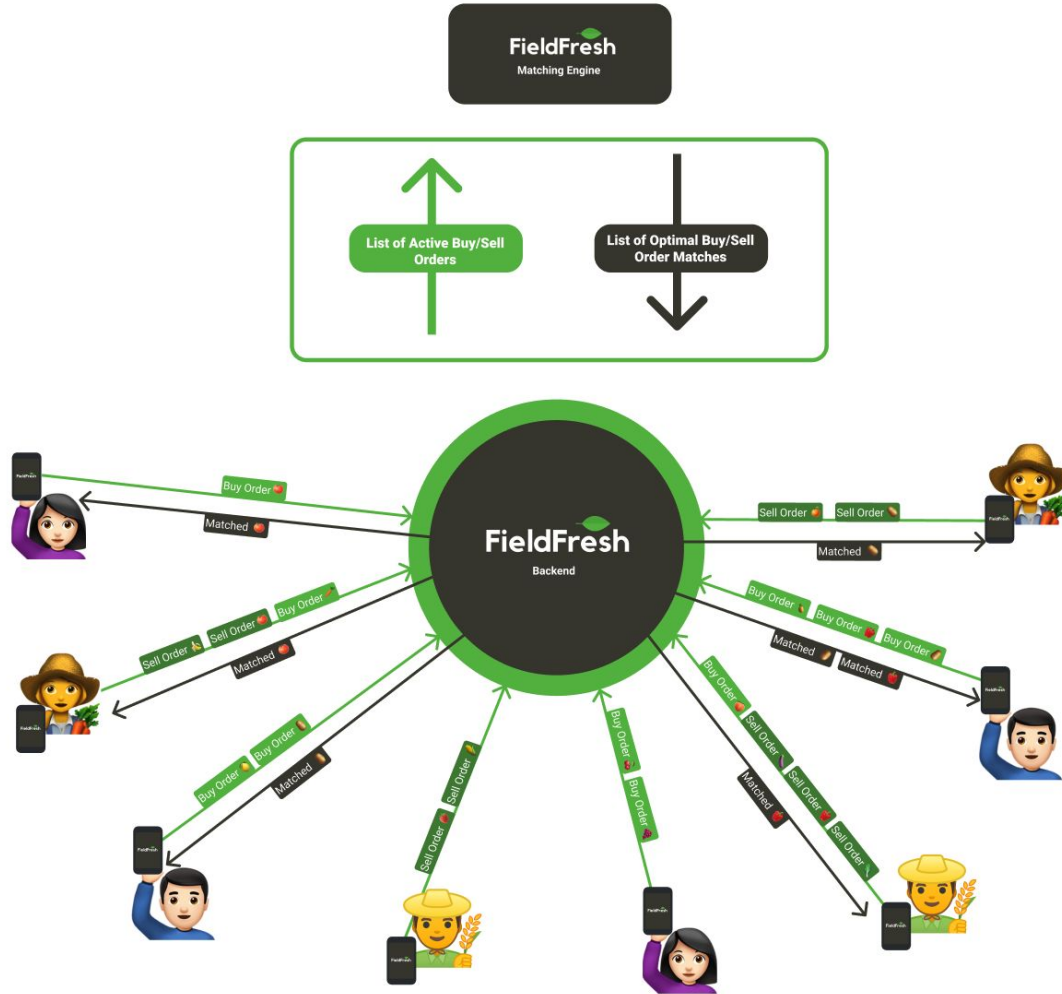

**DESIGNS COMPLETED**  
FEBRUARY 2021

**INITIAL  
DEVELOPMENT  
COMPLETE**  
MARCH 2021

**VALIDATION &  
VERIFICATION**  
MARCH 2021

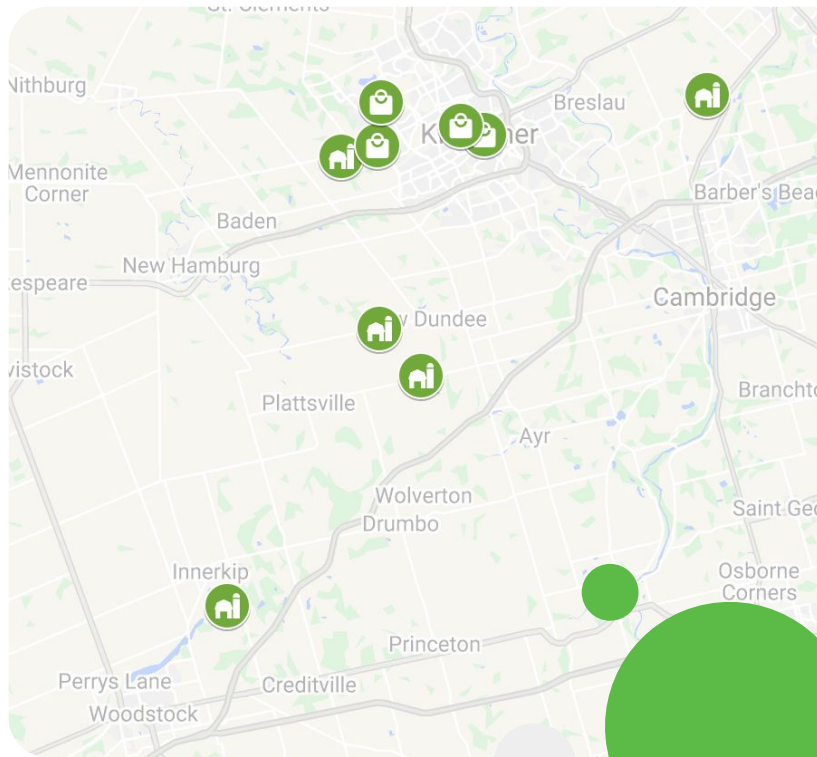

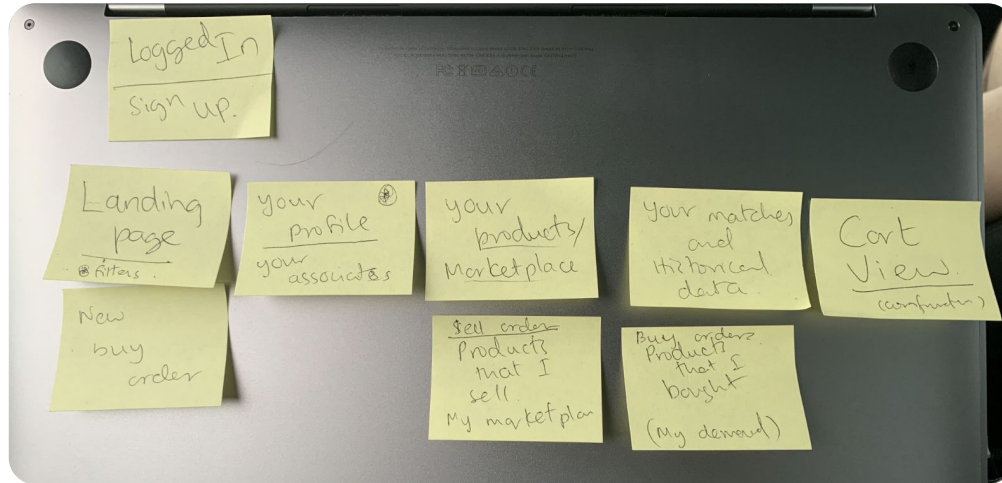

# OUR UI

- Collected requirements from going to 4 stores and 5 farms
- Farms are not satisfied with the existing solutions
- Existing solutions lacked a focus on design and usability

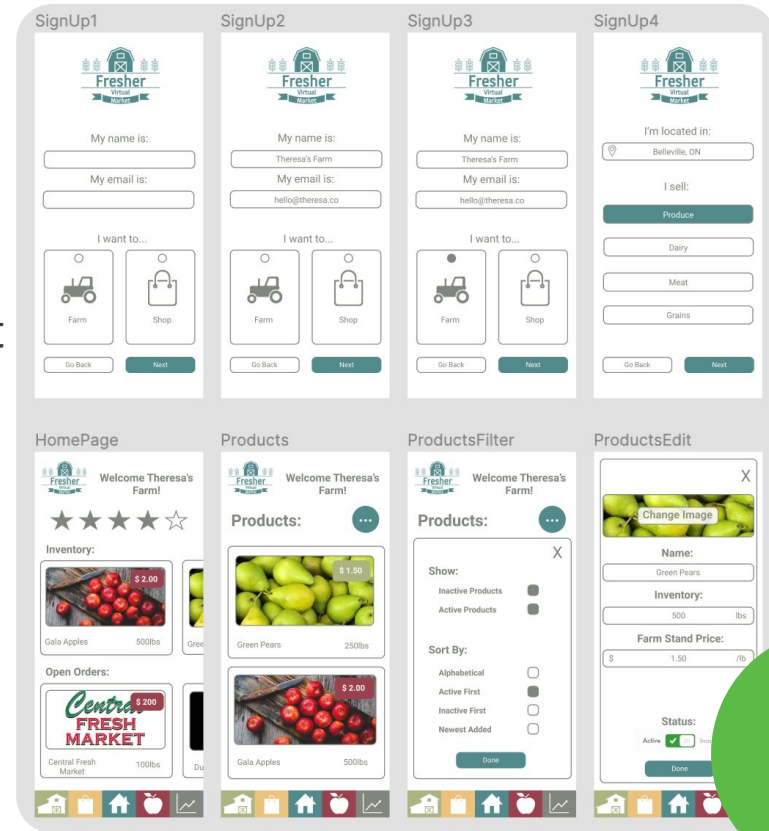

# OUR UI

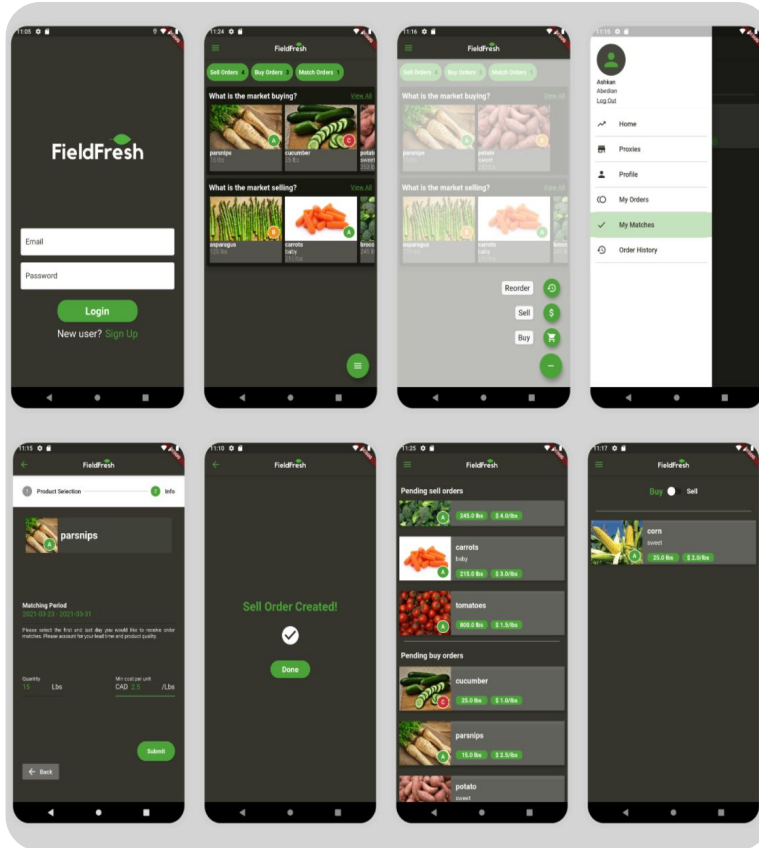

- Decided a mobile solution was best
- Created user flows and wireframes
- Validated requirements and assumptions with farmers

# OUR UI

- Created first Figma prototypes
- Determined that iOS and Android must be supported
- Conducted AB testing and cognitive walkthroughs with users

# OUR UI

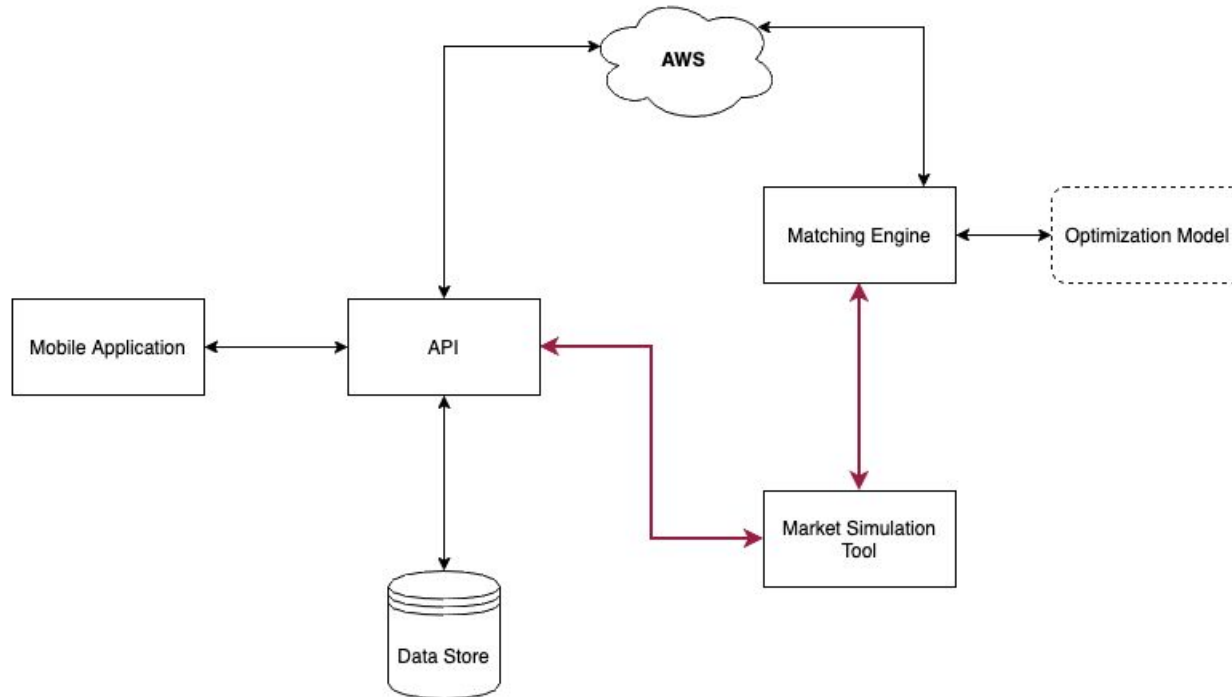

- Rebranded the app by creating a logo and color scheme
- Created a “Happy Path”
- Validated application with farmers

# DEMO

# ARCHITECTURE

---

# OUR MODEL

---

- Order matching model
- Sets
  - Buy orders
  - Sell orders
- Parameters
  - Price upper bound
  - Price lower bound
  - Quantity demanded
  - Quantity supplied
  - Fixed transaction cost
  - Match feasibility
- Decision Variables
  - Quantity matched
  - If a match occurs
  - If a buy order is matched

## STEP 1

Generate  
hypothetical  
buy/sell  
orders based  
on market  
data

## STEP 2

Run  
optimization  
model with  
the buy/sell  
orders

## STEP 3

Calculate and  
graph  
validation  
metrics  
based on  
decisions

---

# MARKET SIMULATION

---

# VALIDATION AND VERIFICATION

## DEVELOPMENT

Changes were made to the UI and model

## VERIFICATION

Market simulations were done using our tool

## VALIDATION

Walkthroughs were done with stakeholders

---

# **IMPACT**

---

**INCREASE PROFITS  
FOR FARMERS**

**BOOST LOCAL  
ECONOMY**

**REDUCTION OF  
FOOD WASTE**

# THANK YOU!
